Ruby on Rails, React.js, Laravel, Node.js, Bootstrap, Tailwind, Redis, .Net, JQuery

Databases

PostgreSQL, MySQL, SQL Server, SQLite, FireBird,

Tools and platform

Heroku, AWS, Github, Git, Postman, SOAP, Filezilla, Google Cloud, Firebase, Google analytics, Minitest, RSpec, Capybara,

Certifications

- Scrum Fundamentals Certification
- Scrum Master Certification
- MagmaLabs Ruby on Rails Bootcamp Certificate

Languages

- Technical English
- Native Spanish

Education

- Ingeniero en Tecnología de la Información (ITI) —
Titulado 2016 - 2020
*Universidad Tecnológica de Manzanillo (UTeM),
Manzanillo, Colima*

Experience

- **Full Stack Developer**
JettyMX October 2021 - July 2026
Worked primarily with Ruby on Rails in Backend and Full Stack development, maintaining and adding new features to different systems. My responsibilities included bug fixing, API and Web Services development and integration, electronic invoicing and payment method integrations, database administration, deployments, and Heroku application maintenance. I also contributed to requirements analysis and problem-solving within projects.
- **Backend Developer**
EctoTec March 2021 - August 2021
Backend development with Symfony, mainly focused on creating and maintaining REST APIs. I participated in the integration of external services, including Microsoft and Google login, as well as developing automated form generators for different processes within the system.
- **Full Stack Developer**
Corporativo Internacional Especializado December 2020 - January 2021
Developed and maintained web applications, performed data analysis, and managed Linux servers. Main responsibilities included:
 - Created advanced queries and extracted accounting data using MySQL and SQL Server.
 - Developed internal Laravel systems for Human Resources document management.
 - Developed a transportation tracking and customs management system, including form and PDF document generation.
 - Developed a ticket-based support platform for executives.
 - Developed a branch reference assignment system using MySQL and Firebird.
 - Managed and maintained Linux servers.
